World-class race car driver, commentator, and entrepreneur Derek Daley draws on his original research and first hand experience with some of the legends of auto racing to explain why some individuals and teams reach their potential, others fail, and what a race driver needs to stay at the top and win year after year. In this unique presentation on the mechanics of success and the principles of high performance, Daley outlines the **six key aspects of becoming a successful race car driver**. He describes the strengths and weaknesses among different drivers and details how these come into play in creating a champion. Written from years of personal experience, observation, and involvement with the racing world this is an invaluable book for any racer, performance driver, and would-be racer.

"...teaches lessons it took guys like me years to learn..." Mario Andretti
